Second, you can click the icon of "file" and select to add PDF files.

Third, you can directly drag the PDF files into Simple PDF Page Cut.

(4) Command line mode

Simple PDF Page Cut also offers you the command line mode. If you are familiar with the computer program, you can operate it directly by command line.

```
PPCCMD.exe <Source PDF> <Destination PDF> <Lines>

Parameters:

<Source PDF>        Source PDF file.
<Output PDF>        Specifies the name for the output file.
<Lines>             Specifies horizontal cut lines and vertical cut
                    Lines position; set cut page order The <Lines> can be
                    like this:
                    -L<pages>=(Horizaontal lines),(Vertical lines):<Page
                    Order>
                    <Lines> Parameter:
                       <pages>: means all pages 1-10,20,23 : means from
                                page 1 to page 10 and so on...
                    (Horizaontal lines),(Vertical lines) should looks
                    like: (10,20,30),(50) which means pages will be cut
                            based on: three horizaontal lines
                            (position:10%,20%,30%) and one vertical line
                            (in the middle of the page)
                    <Page Order>: should be:F or L or H or V
                                  F: First-Last, L:Last-First, H:
                                  Horizontal V: Vertical.
                    Example: "-L*=(),(50):F": meams all page in the source
                            file will be cut into half based on a vertical
                            line and the output file''s page order will be
                            "First-Last"

Return code:
0: Success
2: Input PDF not found
3: The parameters are invalid.
4: Load PDF error
5: Password error
6: Nonsupport security
7: Failed to save the ouput file

Example:
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L*=(),(50):F"
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L*=(50),():L"
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L1-
10,33=(10,20),(20,60,80):H"
PPCCMD "C:\input.pdf" "C:\output.pdf" "-L*=(),(50):V" "-L9-
15,32=(50),():V"
```
