Simple PDF Watermark also allows you to create Text, image watermarks by yourself. Just double click the watermark box, and begin to edit your watermark in the editing box.

**(7) Option**

You can set watermark outputting options just by click the icon of “settings” on the left bottom of operation interface.

**General option:** Page range allows you to apply the watermark to all pages, odd pages or even pages. Moreover, you can also define the page range for yourself. It also allows you to add security to your pdf files and append .BAK to existing extends.

The screenshot shows a settings panel for watermarking PDFs. It is divided into several sections:

- Page Range:** Contains three radio buttons:  All Pages,  Odd Pages, and  Even Pages.
- Page No.:** A radio button  All Pages and another radio button  Page No. followed by a text input field. Below it, an example is provided: "Example: 1,7,10-15,-1,-2" with a note that "-1 stand for the last page, -2 stand for penultimate page, and so on."
- PageScale:** A checkbox  PageScale and a text input field "Scale page to" with the value "100" and the text "% before applying watermark."
- Position in page:** A 3x3 grid of checkboxes for selecting watermark positions.
- Add Security:** A button labeled "Add Security" and the text "Current Security: None".
- Backup file on added watermark:** A checked checkbox  Backup file on added watermark, followed by two radio buttons:  Append .BAK to existing extends and  Backup to Directory. Below these is a text input field and a "Browse..." button.

**PDF Print:** If you want to stamp your watermarks only on the printing pages, you just need to set the print range. What? more, you can also define the print page by yourself, you just need to input the page number directly.

If you do not have Shell Print setup for PDF files on your computer, the best solution to this problem is to download the latest version of Foxit Reader or Adobe Acrobat Reader. You can download it in here:

Acrobat Reader: <http://www.adobe.com/products/acrobat/arupdate.html>

Foxit Reader: <http://www.foxitsoftware.com/pdf/reader/download.php>
